<p>Section: I F 1</p> <p align="center">Administration/Management ADMISSION SCREENING Detention Screening Instrument</p>	
<p>Objective: <i>To ensure consistent, objective criteria are utilized to screen juveniles to determine if they will be detained.</i></p>	<p align="center">Adopted April 4, 2011</p>

F 1.1 The placement of pre-dispositional juveniles in detention imposes the highest level of restraint on personal liberty and, consequently, shall only temporarily occur when it is the least restrictive method available to protect public safety or reduce the flight risk of a court-involved juvenile. Decisions to detain shall be consistent with current national standards and Best Practice models of juvenile rehabilitation.

F 1.2 Juvenile Courts shall develop plans regarding the use of detention. The plans shall include:

- a) The development of a local written policy that defines the Purpose of Detention. The purpose(s) shall be risk-based and not driven by the needs of a juvenile. The decision to detain and the length of detention shall be logically related to the seriousness of the violation or offense and the minor's risk to community safety, and shall be made within the context of an articulated system of graduated responses.
- b) Alternatives to Detention (ATD) shall be considered and implemented when possible.
- c) Acknowledgment that some juveniles may require detention but, also, recognition that there are inherent therapeutically-based dangers of detention that shall be considered.
- d) Decisions to detain juveniles shall be the result of an objective, consistent intake process.
- e) Intake staff shall use the approved screening instrument to determine whether a juvenile will be detained or released.
- f) Upon issuance of an Order by a judge to detain a juvenile, assigned staff shall immediately begin transition planning that will reduce the risk to public safety and facilitate release of the juvenile.

F 1.3 The director of juvenile court services shall ensure the development and utilization of a standardized risk assessment instrument (RAI), using Evidence-based Practices (EBP), to determine whether a youth shall be detained when referred by law enforcement or other sources to the detention center. The RAI development is to

be the result of collaboration between key stakeholders in the juvenile justice continuum and may include the Presiding Juvenile Court Judge, the Director or Chief Probation Officer, the County Attorney, Public Defender, Probation representation and other parties pertinent to the specific jurisdiction.

F 1.4 The RAI shall contain the following elements:

- a) Identifying data that includes, at a minimum, the juvenile's name, JOLTS #, birth date, gender, race or ethnicity, date of referral, referring offense, referring agency and name of the staff completing the intake process.
- b) A numerical scale that defines cutoff point ranges for low, medium and high risk juveniles.
- c) Discrete sections that assign points based on the seriousness of the current referral, prior delinquent history, current legal status and aggravating or mitigating factors that have common, objective definitions utilized by each detention center in Arizona.
- d) An Override section that permits detainment of a juvenile whose point total does not meet detainment criteria or release of a juvenile whose point total meets or exceeds the detainment requirement. Use of an override by staff requires prior supervisory (or designee not involved in the presenting intake process) approval and the reason(s) for the override shall be clearly documented on the RAI. (Override usage shall fall within the acceptable national standard of no more than 15 – 20% of total juveniles detained.)
- e) Special detention cases may result in automatic detention, without the use of override, provided they meet accepted national standards, such as probation violations that include alleged delinquent offenses or arrest based on a warrant. Status offenses by themselves, as defined by Federal law, would not qualify as a special detention case.

F 1.5 Staff responsible for intake screening shall receive initial and annual training to ensure accurate use of the RAI.

F 1.6 The director of juvenile court services or designee of juvenile court services shall ensure periodic internal review of the RAI utilization practices to ensure appropriate decision-making and fidelity to the model.

F 1.7 The director of juvenile court services shall ensure the accurate collection of detention data consistent with statewide standards to include, at a minimum, total number of juveniles detained, gender, race and ethnicity, average length of stay, number of overrides used to detain or release juveniles and categorical reasons for detention. This statewide data shall be reviewed periodically, but not less than annually, at the Juvenile Administrator's Meeting (JAM) and the Committee on Juvenile Courts (COJC).

- F 1.8** The director of juvenile court services shall insure Disproportionate Minority Contact (DMC) data shall be collected and reviewed at least annually at the JAM and the COJC to monitor the number of minority juveniles detained locally and statewide.
- F 1.9** The Administrative Office of the Courts (AOC) shall evaluate each local RAI, allowing for sufficient data collection, with the goal of validation or adjustment of the instrument, if necessary, to achieve validation.
